PROFILE

Systems Engineer with backend and frontend development experience. Currently pursuing specialization in Information Security. Focused on code quality, teamwork, and problem-solving.

SKILLS

Languages: Python, JavaScript, TypeScript, Java
Frameworks & Libraries: Flask, Django, React, Angular, Tailwind CSS
Mobile Development: Flutter, Firebase
Databases: MySQL, Firebase, Supabase
Tools: Git, GitHub, REST APIs, Postman, Vercel

EXPERIENCE

Grupo Élite

Information Manager & Commercial Support · June 2026 - July 2026

- Proactively audited and updated approximately 500 weekly client records in databases, ensuring over 70% accuracy and integrity in user information.
- Managed commercial requirements and contract generation through enterprise software, reducing sales closing time by 15%.

PROJECTS

EBookTools — Web Platform for Ebook Tools (ebooktools.vercel.app)

Fullstack Developer

- Developed a complete ebook processing toolkit with 5 tools: PDF/EPUB compression, text-to-speech conversion, format conversion, metadata editor, and automatic renaming.
- Implemented 100% client-side processing to ensure user privacy, deployed on Vercel with Open Library and Google Books API integration.
